Rejuvenated.**

Heat Management Properties

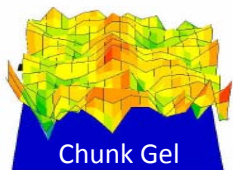

- 20% greater temperature consistency
- Better support reducing foam cradling that creates heat build-up
- 100% distribution of Gel benefits over sleep surface and depth of mattress

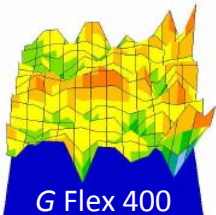

Surface Temperature Mapping

Memory Foam reflects body heat, increasing your sleep surface temperature.

Randomly distributed pieces of gel can create surface hot spots, interrupting sleep.

G Flex™, 100% gel infused foam, wicks heat away from your body, keeping your sleep surface cooler.
